

**Santa Susana Field Laboratory (SSFL)**  
**Resource Conservation and Recovery Act, Facility Investigation (RFI) Workplan**  
**Area I Burn Pit**

**Due to the size of the files, we recommend you request either CDs or a DVD.**

Contact DTSC Public Participation Specialist, Nathan Schumacher, toll free at (866) 495-5651, or email [NSchumac@dtsc.ca.gov](mailto:NSchumac@dtsc.ca.gov) to request a copy.

The Area I Burn Pit RFI Workplan (Workplan) and numerous historical documents are now available online. DTSC is working to reduce the file sizes. Follow the prompts to download each set of compressed files. The files are divided into two groups, Workplan files and Historical Document files. There are between 10,000 and 15,000 pages of historical documents. DTSC plans to add an index for the historical documents. The Workplan and accompanying historical documents will receive DTSC review before final approval. Public comments are welcome. Please send comments to Nathan Schumacher by email or by US mail to Nathan Schumacher, DTSC, 8800 Cal Center Dr., Sacramento California 95826.

**\*Warning! These are very large files. Download times may take more than two days.**

## Instructions To UnZip Documents

Due to the size of the files, we **strongly** suggest that you request either CDs or a DVD. If you do decide to run or save the documents to your computer, check first to insure you have enough memory to either “Run” or “Save” these documents. We also suggest that once you have read the documents, that you delete them from your hard drive to reduce unnecessary memory usage.

When opening a WinZip file, you will be given the option “Run” or “Save” the files.

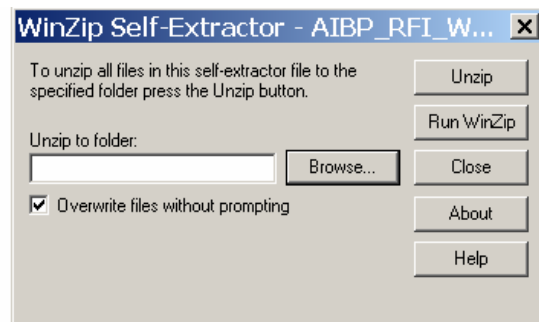

Click on “Run”

The files will try to Unzip to “DTSC\_Downloads” which will make finding and later deleting them easier.

Click “UnZip”

It will tell you that the files have unzipped successfully. Click “OK”

You will get a screen showing that the files are downloading. Once this has finished, you should get an option to “Open” the folder.

If you aren't given the option to “open” the downloaded files:

Right mouse click on “Start” and left mouse on “Explore.” Go to your C drive, and look for “DTSC-Downloads” to access the files.
